INDEX TO SUBJECTS

A

Actin association with spectrin, human erythrocyte ghosts, biochemical and EM study, 508
—, *Echinosphaerium nucleofilum* cytoplasm, molecular basis of contractility, light and EM study, 156
—, polymerized, preparation and purification from sea urchin eggs, biochemical and light and EM study, 305
Actin-like filaments, mouse calvaria bone cells, binding to heavy meromyosin, biochemical and EM study, 445
Adenosine monophosphate, dibutyryl cyclic, and testololactone antagonism of concanavalin A capping, CHO-K1 cells, cytological and EM study, 392
— triphosphatase, transport, ultrastructural localization, rat kidney cortex, cytochemical light and EM study, 586
Adhesion of cells to surfaces coated with polylysine, EM study, 198
Alga *Chlamydomonas reinhardtii*, *bald-2* mutation, formation of singlet microtubules, EM study, 480
— green *Acetabularia mediterranea* and *A. cliftonii*, nuclear envelope growth in vegetative phase, EM study, 681
Amino acid uptake, antibiotic synthesis, and sporulation, *Bacillus brevis*, biochemical and EM study, 233
Anionic sites, distribution and mobility of, cell surface of baby hamster kidney cells, cytochemical EM study, 470
Annelid *Chaetopterus pergamentaceous*, oocytes, pressure-induced depolymerization of spindle microtubules, thermodynamic study, 114
Antibiotic synthesis, sporulation, and amino acid uptake, *Bacillus brevis*, biochemical and EM study, 233
— X537A, response of Golgi apparatus to, rabbit smooth muscle, epithelium, plasma cells, chick heart and guinea pig vascular smooth muscle cells, phase contrast, fluorescence and EM study, 425
Antibiotics, chloramphenicol and ethidium bromide, effects on morphology and metabolism, *Ustilago cynodontis*, cytological study, 102
Axon, mammalian neuron, major structural polypeptides, slow component of axonal transport, biochemical study, 351
Axoneme, role in particle motion, *Echinosphaerium nucleofilum* axopodia, photokymographic study, 145
— with 6 + 0 pattern, *Lecudina tuzetae* flagella, cinematographic and EM study, 492
Axopodia, *Echinosphaerium nucleofilum*, particle motions, role of axoneme, photokymographic study, 145

B

Bacteria *Bacillus brevis*, sporulation, antibiotic synthesis and amino acid uptake, biochemical and EM study, 233
Basal body, *Chlamydomonas reinhardtii bald-2* mutation, formation of singlet microtubules, EM study, 480
Binding of cells, lectin-coated fibers, receptor mobility, biochemical study, 76
Bone cells, mouse calvaria, actin-like filaments, binding to heavy meromyosin, biochemical and EM study, 445
Brain, mouse, distribution of cholesterol, biochemical and autoradiographic light and EM study, 333
α-Bungarotoxin binding, mouse sternomastoid muscle, in vivo recovery of muscle contraction, physiological and autoradiographic EM study, 209

C

Capillary permeability to horseradish peroxidase, mouse diaphragm, cytochemical EM study, 531
Capping, concanavalin A, CHO-K1 cells, antagonism by dibutyryl cyclic AMP and testololactone, cytological and EM study, 392
Carbon sources, effects on morphology and metabolism, *Ustilago cynodontis*, cytological study, 102
Cell behavior, and occluding junctions, mouse mammary adenocarcinoma cells, cytological and freeze-fracture EM study, 316
— cycle, human leukemic lymphoblasts CCRF-CEM, propidium iodide staining, rapid flow cytofluorometric study, 188
— cycle, human leukemic lymphoblasts, effect of podophyllotoxins, cytofluorometric study, 521
—cycle, *Tetrahymena pyriformis*, production of DNA during extra S phases, autoradiographic and cytological study, 204
— movement and upper cell surface in culture, letters to the editor, 215, 216, 218
Cells, amebas, mammalian, and sea urchin eggs, adhesion to surfaces coated with polylysine, EM study, 198
—, baby hamster kidney 21–13S, distribution and mobility of anionic sites on cell surface, cytochemical EM study, 470
—, bone, mouse calvaria, actin-like filaments, binding to heavy meromyosin, biochemical and EM study, 445
—, chick heart and guinea pig vascular smooth muscle, Golgi apparatus, response to antibiotic X537A, phase contrast, fluorescence and EM study, 425
—, Chinese hamster ovary K1, antagonism by dibutyryl

cyclic AMP and testololactone of concanavalin A capping, cytological and EM study, 392
Cells, Chinese hamster ovary, nucleolus, RNA synthesis, autoradiographic and biochemical study, 577
—, Chinese hamster ovary, synchronization by isoleucine deprivation or mitotic selection, detection of G_1 proteins, biochemical study, 95
—, diploid human and mouse fibroblasts, mitogenic effect of fibroblast growth factor on early passage cultures, cytological study, 451
—, epithelial and fibroblasts, mouse mammary gland, upper cell surface and active cell movement, letters to the editor, 215, 216, 218
—, exocrine, rat pancreas, microfilaments and enzyme secretion, effect of cytochalasin B, biochemical and EM study, 165
—, HeLa strain R, induction of ganglioside sialyltransferase by small fatty acids, biochemical and light microscope study, 414
—, human erythrocyte ghosts, ultramicroinjection of macromolecules or small particles, virus-induced cell fusion technique, biochemical and EM study, 292
—, human lymphoblasts CCRF-CEM, action of podophyllotoxins on cell cycle, cytofluorometric study, 521
—, human lymphoblasts CCRF-CEM, analysis of cell cycle by propidium iodide staining, rapid flow cytofluorometric study, 188
—, lymphoma, normal lymphocytes, myeloid leukemia, and fibroblasts, receptor mobility and binding to lectin-coated fibers, biochemical study, 76
—, mouse L and HeLa S-3, mouse-human heterokaryon formation, 33258 Hoechst-Giemsa technique, autoradiographic and cytological study, 676
—, mouse mammary adenocarcinoma, occluding junctions and dome formation, cytological and freeze-fracture EM study, 316
—, mouse mastocytoma P815Y, role of microvilli in surface changes, biochemical and scanning EM study, 568
Chick embryo cornea, stimulation of epithelial collagen synthesis by interaction between cell surface and extracellular matrix, transfilter induction, biochemical and EM study, 275
Chloramphenicol, effects on morphology and metabolism, *Ustilago cynodontis*, cytological study, 102
Cholesterol distribution, mouse brain, biochemical and autoradiographic light and EM study, 333
Chondriome, trypanosomatids, three-dimensional analysis, serial thick sections and high voltage EM study, 404
Cilia, *Mytilus edulis* gill, laser-induced spreading arrest, slit camera microscope study, 377
Colchicine binding, mouse liver protein, relation to microtubules, biochemical and EM study, 609
—, effect on particle motion, *Echinosphaerium nucleofilum* axopodia, photokymographic study, 145
— inhibition of mitogen stimulation, lymphocytes prior to S phase, biochemical and cytological study, 128
—, inhibition of plasma protein secretion, rat hepatocytes, biochemical and EM study, 42
Collagen synthesis, chick cornea epithelium, stimulation by interaction between cell surface and extracellular matrix, transfilter induction, biochemical and EM study, 275
Concanavalin A capping, CHO-K1 cells, antagonism by dibutyryl cyclic AMP and testololactone, cytological and EM study, 392
— stimulation of lymphocytes, colchicine inhibition prior to S phase, biochemical and cytological study, 128
Contraction, muscle, mouse, in vivo recovery after α-bungarotoxin binding, physiological and autoradiographic EM study, 209
Cornea, chick embryo, stimulation of epithelial collagen synthesis by interaction between cell surface and extracellular matrix, transfilter induction, biochemical and EM study, 275
Crystals, iridophore, lizard skin, biochemical and light and EM study, 635
Cytochalasin B, effect on microfilaments and enzyme secretion, rat exocrine pancreas, biochemical and EM study, 165
Cytoplasm, *Echinosphaerium nucleofilum*, molecular basis of contractility, light and EM study, 156
—, role in nuclear envelope growth, vegetative phase of green alga *Acetabularia*, EM study, 681
—, starfish oocytes, activation by sperm and divalent ionophore (A-23187), histological study, 86

D

Deoxyribonucleic acid amplification, absence of in ribosomes, milkweed bug, meroistic ovary, biochemical study, 461
— acid, human leukemic lymphoblasts, effect of podophyllotoxins, cytofluorometric study, 521
— acid, mammalian cell cycle, propidium iodide staining, rapid flow cytofluorometric study, 188
— acid replication during extra S phases, *Tetrahymena pyriformis*, autoradiographic and cytological study, 204
— acid synthesis, mouse mammary gland, effects of serum and insulin, biochemical study, 243
Diaphragm, mouse, permeability of muscle capillaries to horseradish peroxidase, cytochemical EM study, 531
Dome formation, mouse mammary adenocarcinoma cells, cytological and freeze-fracture EM study, 316
Dynein arms, lack in immotile human spermatozoa, biochemical and EM study, 225

E

Echinosphaerium nucleofilum, axopodia, particle motions, role of axoneme, photokymographic study, 145
— *nucleofilum*, cytoplasm, molecular basis of contractility, light and EM study, 156
Ectoplasm, *Amoeba proteus*, oriented thick and thin filaments, light and EM study, 193
Egg, mammalian, lectin-binding sites on zonae pellucidae and plasma membranes, cytochemical EM study, 263
Electrical currents, growing lily pollen tubes, physiological study, 556
Endocytosis or fusion of phospholipid vesicles, *Acanthamoeba castellanii* plasma membrane, autoradiographic and biochemical and EM study, 621
Endothelial cell junctions, rat liver, freeze-cleave EM study, 200

Enzyme, cytochrome oxidase, sea urchin sperm mitochondria, during embryogenesis, cytochemical EM study, 367
—, glucose-6-phosphatase, isolation and subfractionation of rat hepatocytes, biochemical and cytochemical light and EM study, 1
—, horseradish peroxidase, permeability of muscle capillaries, mouse diaphragm, cytochemical EM study, 531
— release, lysosomal, human polymorphonuclear leukocytes, effect of phorbol myristate acetate, biochemical and EM study, 647
— secretion, chymotrypsinogen and lipase, microfilaments, rat exocrine pancreas, effect of cytochalasin B, biochemical and EM study, 165
—, sialyltransferase, HeLa cells gangliosides, induction by small fatty acids, biochemical and light microscope study, 414
—, transport ATPase, ultrastructural localization, rat kidney cortex, cytochemical light and EM study, 586
Epithelium, chick embryo cornea, stimulation of collagen synthesis by interaction between cell surface and extracellular matrix, transfilter induction, biochemical and EM study, 275
—, mouse mammary gland, effects of serum and insulin on proliferation of and DNA synthesis, biochemical study, 243
—, rabbit eye ciliary body, atypical gap junctions, EM study, 671
—, rat thyroid, effect of thyroid activity on tight junctions, freeze-fracture EM study, 657
Erythrocyte ghosts, human, association of actin with spectrin, biochemical and EM study, 508
— ghosts, human, ultramicroinjection of macromolecules or small particles, virus-induced cell fusion technique, biochemical and EM study, 292
Ethidium bromide, effects on morphology and metabolism, *Ustilago cynodontis*, cytological study, 102
Eye, rabbit, atypical gap junctions in ciliary epithelium, EM study, 671

F

Fatty acids, propionic, butyric, and pentanoic, induction of ganglioside sialyltransferase, HeLa cells, biochemical and light microscopic study, 414
Ferritin, binding of anionic sites, cell surface of baby hamster kidney cells, cytochemical EM study, 470
Fertilization, effect on mouse sperm basic nuclear protein, autoradiographic and biochemical and histological study, 251
Fibroblast growth factor, mitogenic effect on early passage cultures of human and murine fibroblasts, cytological study, 451
Filaments, actin-like, mouse calvaria bone cells, binding to heavy meromyosin, biochemical and EM study, 445
—, thick and thin, orientation of, *Amoeba proteus*, light and EM study, 193
Flagella, *Lecudina tuzetae*, axoneme with 6 + 0 pattern, cinematographic and EM study, 492
Fluorescent tracers, nucleocytoplasmic movement of, *Chironomus thummi* salivary gland, light microscope study, 652
Fluorochrome 33258 Hoechst and Giemsa technique, mouse-human heterokaryon analysis, autoradiographic and cytological study, 676
Fungus *Ustilago cynodontis*, effects of carbon sources and antibiotics on morphology and metabolism, cytological study, 102
Fusion or endocytosis of phospholipid vesicles, *Acanthamoeba castellanii* plasma membrane, autoradiographic and biochemical and EM study, 621

G

Ganglioside sialyltransferase, HeLa cells, induction by small fatty acids, biochemical and light microscope study, 414
Gelation, preparation of polymerized actin, sea urchin eggs, biochemical and light and EM study, 305
Gill cilia, *Mytilus edulis*, laser-induced spreading arrest, slit camera microscope study, 377
Glucose-6-phosphatase, isolation and subfractionation of rat hepatocytes, biochemical and cytochemical light and EM study, 1
Glutaraldehyde:carbohydrazide polymer, cholesterol distribution, mouse brain, biochemical and autoradiographic light and EM study, 333
Golgi apparatus, response to antibiotic X537A, rabbit smooth muscle, epithelium, plasma cells and chick heart and guinea pig vascular smooth muscle cells, phase contrast, fluorescence and EM study, 425
G_1 proteins, detection of in CHO cells synchronized by isoleucine deprivation or mitotic selection, biochemical study, 95
Granules, azurophil and specific, rabbit polymorphonuclear leukocytes, ricin-binding sites on outer face, EM study, 183
Growth factor, fibroblast, mitogenic effect on early passage cultures of human and murine fibroblasts, cytological study, 451

H

Hamster, egg, lectin-binding sites on zonae pellucidae and plasma membranes, cytochemical EM study, 263
Heat shock, *Tetrahymena pyriformis*, DNA replication during extra S phases, autoradiographic and cytological study, 204
Hepatocytes, rat, centrolobular and perilobular, effect of phenobarbital, biochemical and cytochemical light and EM study, 23
—, rat, colchicine inhibition of plasma protein secretion, biochemical and EM study, 42
—, rat, isolation and subfractionation on ficoll gradients, biochemical and cytochemical light and EM study, 1
Heterokaryon formation, mouse-human, 33258 Hoechst-Giemsa technique, autoradiographic and cytological study, 676
Hormones, effects on upper cell surface and active cell movement, letter to the editor, 215
Human, erythrocyte ghosts, association of actin with spectrin, biochemical and EM study, 508
—, erythrocyte ghosts, ultramicroinjection of macromolecules or small particles, virus-induced cell fusion technique, biochemical and EM study, 292
—, lymphocytes, colchicine inhibition of mitogenic stim-

ulation prior to S phase, biochemical and cytological study, 128
Human, polymorphonuclear leukocytes, lysosomal enzyme release, effect of phorbol myristate acetate, biochemical and EM study, 647
—, spermatozoa, immobile, lack of dynein arms, biochemical and EM study, 225

I

Injection, ultramicro-, macromolecules or small particles into animal cells, virus-induced cell fusion technique, biochemical and EM study, 292
Insect *Chironomus thummi*, salivary gland, nucleocytoplasmic movement of fluorescent tracers, light microscope study, 652
—, milkweed bug *Oncopeltus fasciatus*, merioistic ovary, absence of ribosomal DNA amplification, biochemical study, 461
Insulin, effect on epithelial proliferation and DNA synthesis, mouse mammary gland, biochemical study, 243
Ionophore (A-23187), divalent, cytoplasmic activation of starfish oocytes, histological study, 86
Iridophore crystals, lizard skin, biochemical and light and EM study, 635
Isoleucine deprivation, synchronization of CHO cells, detection of G_1 proteins, biochemical study, 95

J

Junctions, endothelial cell, rat liver, freeze-cleave EM study, 200
—, gap, atypical, ciliary epithelium, rabbit eye, EM study, 671
—, occluding, mouse mammary adenocarcinoma cells, cytological and freeze-fracture EM study, 316
—, tight, rat thyroid epithelium, effect of thyroid activity, freeze-fracture EM study, 657

K

Kidney cortex, rat, ultrastructural localization of transport ATPase, cytochemical light and EM study, 586

L

Laser induction of spreading arrest, *Mytilus edulis* gill cilia, slit camera microscope study, 377
Lectin-coated fibers, cell binding, receptor mobility, biochemical study, 76
Lectins, *Ricinus communis* agglutinin I, concanavalin A, and wheat germ agglutinin, binding sites on zonae pellucidae and plasma membranes, mammalian eggs, cytochemical EM study, 263
Leukocytes, human polymorphonuclear, lysosomal enzyme release, effect of phorbol myristate acetate, biochemical and EM study, 647
—, polymorphonuclear, rabbit, ricin-binding sites on outer face of azurophil and specific granules, EM study, 183
Liver, mouse, colchicine-binding protein, relation to microtubules, biochemical and EM study, 609
—, rat, endothelial cell junctions, freeze-cleave EM study, 200
Liver, rat, isolation of centrolobular and perilobular hepatocytes, effect of phenobarbital, biochemical and cytochemical light and EM study, 23
—, rat, isolation and subfractionation of hepatocytes on ficoll gradients, biochemical and cytochemical light and EM study, 1
Lizard *Anolis carolinensis*, dermal iridophore crystals, biochemical and light and EM study, 635
Lymphocytes, human, rabbit, and mouse, colchicine inhibition of mitogenic stimulation prior to S phase, biochemical and cytological study, 128
Lysosomes, human polymorphonuclear leukocytes, effect of phorbol myristate acetate on enzyme release, biochemical and EM study, 647

M

Macromolecules or small particles, ultramicroinjection into animal cells, virus-induced cell fusion technique, biochemical and EM study, 292
Mammal, rat and cat, neurons, slow component of axonal transport, major structural polypeptides of axon, biochemical study, 351
Matrix, extracellular, interaction with cell surface, stimulation of chick cornea epithelial collagen synthesis, transfilter induction, biochemical and EM study, 275
Melanocytes, neural crest-derived of skin, hair, and feathers, nonneural crest-derived of retinal pigment epithelium, mitotic activity, autoradiographic and light and EM study, 663
Membrane, nuclear envelope, growth in vegetative phase of green alga *Acetabularia*, EM study, 681
—, plasma, *Acanthamoeba castellanii*, interaction with phospholipid vesicles by endocytosis or fusion, autoradiographic and biochemical and EM study, 621
—, plasma, and zonae pellucidae, mammalian eggs, lectin-binding sites, cytochemical EM study, 263
Meromyosin, heavy, binding to actin-like filaments, mouse calvaria bone cells, biochemical and EM study, 445
Microfilaments, rat exocrine pancreas, enzyme secretion, effects of cytochalasin B, biochemical and EM study, 165
Microtubules, mouse liver, colchicine-binding protein, biochemical and EM study, 609
—, singlet, *bald-2*, *Chlamydomonas reinhardtii* mutation, EM study, 480
—, spindle of annelid oocytes, pressure-induced depolymerization, thermodynamic study, 114
Microvilli, role in surface changes, P815Y mastocystoma cells, biochemical and scanning EM study, 568
Mitochondria, sea urchin sperm, cytochrome oxidase during embryogenesis, cytochemical EM study, 367
—, trypanosomatids, three-dimensional analysis, serial thick sections and high voltage EM study, 404
Mitogen stimulation of lymphocytes, colchicine inhibition prior to S phase, biochemical and cytological study, 128
Mitosis, in vivo, nonneoplastic melanocytes, autoradiographic and light and EM study, 663
Mobility, receptor, and binding of cells to lectin-coated fibers, biochemical study, 76
Motility, absence of in human spermatozoa, lack of

dynein arms, biochemical and EM study, 225
Motility, *Echinosphaerium nucleofilum* axopodia, role of axoneme, photokymographic study, 145
—, *Echinosphaerium nucleofilum*, molecular basis of cytoplasmic contractility, light and EM study, 156
Mouse, brain, distribution of cholesterol, biochemical and autoradiographic light and EM study, 333
— calvaria bone cells, actin-like filaments, binding to heavy meromyosin, biochemical and EM study, 445
—, diaphragm, permeability of muscle capillaries to horseradish peroxidase, cytochemical EM study, 531
—, egg, lectin-binding sites on zonae pellucidae and plasma membranes, cytological EM study, 263
—, liver, colchicine-binding protein, relation to microtubules, biochemical and EM study, 609
—, mammary gland, effects of serum and insulin on epithelial proliferation and DNA synthesis, biochemical study, 243
—, sperm, basic nuclear protein after fertilization, autoradiographic and biochemical and histological study, 251
—, sternomastoid muscle, in vivo recovery of contraction after α-bungarotoxin binding, physiological and autoradiographic EM study, 209
Movement, active cell, and upper cell surface, tissue culture, letters to the editor, 215, 216, 218
—, *Lecudina tuzetae*, flagellar axoneme with 6 + 0 pattern, cinematographic and EM study, 492
Muscle, mouse diaphragm, permeability of capillaries to horseradish peroxidase, cytochemical EM study, 531
—, smooth, epithelium, plasma cells, cultured chick heart and guinea pig vascular smooth muscle cells, Golgi apparatus, response to antibiotic X537A, phase contrast, fluorescence, and EM study, 425
—, sternomastoid, mouse, in vivo recovery of contraction after α-bungarotoxin binding, physiological and autoradiographic EM study, 209
Mussel *Mytilus edulis*, gill cilia, laser-induced spreading arrest, slit camera microscope study, 377
Myosin, *Echinosphaerium nucleofilum* cytoplasm, molecular basis of contractility, light and EM study, 156

N

Neonatal rat, photoreceptor differentiation of pinealocytes, light and EM study, 60
Neurons, mammalian, slow component of axonal transport, major structural polypeptides of axon, biochemical study, 351
Nuclear envelope growth, vegetative phase of green alga *Acetabularia*, EM study, 681
Nucleocytoplasmic movement of fluorescent tracers, *Chironomus thummi* salivary gland, light microscope study, 652
Nucleolus, CHO cells, RNA synthesis, autoradiographic and biochemical study, 577
Nucleus, mouse sperm, basic protein after fertilization, autoradiographic and biochemical and histological study, 251

O

Oocytes, *Chaetopterus pergamentaceous*, pressure-induced depolymerization of spindle microtubules, thermodynamic study, 114
Oocytes, sea urchin, preparation and purification of polymerized actin, biochemical and light and EM study, 305
Ovary, meroistic, milkweed bug, absence of ribosomal DNA amplification, biochemical study, 461

P

Pancreas, rat, microfilaments and enzyme secretion in exocrine cells, effect of cytochalasin B, biochemical and EM study, 165
Particle motions, *Echinosphaerium nucleofilum*, axopodia, particle motions, role of axoneme, photokymographic study, 145
Permeability of muscle capillaries to horseradish peroxidase, mouse diaphragm, cytochemical EM study, 531
Phenobarbital, effect on rat centrolobular and perilobular hepatocytes, biochemical and cytochemical light and EM study, 23
Phorbol myristate acetate, effect on lysosomal enzyme release, human polymorphonuclear leukocytes, biochemical and EM study, 647
Phospholipid vesicles, interaction with *Acanthamoeba castellanii* plasma membrane by endocytosis or fusion, autoradiographic and biochemical and EM study, 621
Photoreceptor differentiation, pinealocytes, neonatal rat, light and EM study, 60
Pinealocytes, photoreceptor differentiation, neonatal rat, light and EM study, 60
Plant, lily *Lilium longiflorum*, growing pollen tubes, large electrical currents, physiological study, 556
Podophyllotoxin and epipodophyllotoxins (VM-26, VP-16-213), effect on cell cycle of human leukemic lymphoblasts, cytofluorometric study, 521
Pollen tubes, lily, large electrical currents, physiological study, 556
Polylysine-coated surfaces, adhesion of cells, EM study, 198
Polypeptides, structural, axon of mammalian neuron, slow component of axonal transport, biochemical study, 351
Propidium iodide staining, analysis of mammalian cell cycle, rapid flow cytofluorometric study, 188
Protein, basic, mouse sperm nucleus, effect of fertilization, autoradiographic and biochemical and histological study, 251
—, G_1, detection of in CHO cells synchronized by isoleucine deprivation or mitotic selection, biochemical study, 95
—, mouse liver, binding of colchicine, relation to microtubules, biochemical and EM study, 609
—, plasma, rat hepatocyte secretion, colchicine inhibition, biochemical and EM study, 42
Protozoa, trypanosomatids *Blastocrithidia culicis* and *Trypanosoma cruzi*, chondriome, three-dimensional analysis, serial thick sections and high voltage EM study, 404
Protozoan *Acanthamoeba castellanii*, plasma membrane, interaction with phospholipid vesicles by endocytosis or fusion, autoradiographic and biochemical and EM study, 621
— *Amoeba proteus*, oriented thick and thin filaments,

light and EM study, 193
Protozoan *Lecudina tuzetae*. flagella, axoneme with 6 + 0 pattern, cinematographic and EM study, 492
— *Tetrahymena pyriformis*, production of DNA during extra S phases, autoradiographic and cytological study, 204

R

Rabbit, eye, atypical gap junctions in ciliary epithelium, EM study, 671
—, polymorphonuclear leukocytes, ricin-binding sites on outer face of azurophil and specific granules, EM study, 183
Radioactive label, [acetyl-^{3}H]mannosamine and [^{14}C]-galactose, induction of ganglioside sialyltransferase by small fatty acids, HeLa cells, biochemical and light microscope study, 414
—, label, [^{14}C]dipalmitoyl lecithin, [^{14}C] or [^{3}H]-glucose, [^{3}H]oleic acid, and [^{3}H]inulin, endocytosis or fusion of phospholipid vesicles, *Acanthamoeba castellanii* plasma membrane, autoradiographic and biochemical and EM study. 621
— label, [^{14}C]glucose, [^{14}C] or [^{3}H]2-deoxyglucose, and [^{45}Ca]calcium, microfilaments and enzyme secretion, rat exocrine pancreas, effect of cytochalasin B, biochemical and EM study, 165
— label, [^{14}C]ornithine, [^{14}C]pantothenic acid, [^{14}C]-proline, and [^{3}H]alanine, sporulation, antibiotic synthesis and amino acid uptake, *Bacillus brevis*, biochemical and EM study, 233
— label, [^{14}C] or [^{3}H]isoleucine, detection of G_1 proteins, CHO cells synchronized by isoleucine deprivation or mitotic selection, biochemical study, 95
— label, [^{14}C] and [^{3}H]uridine RNA synthesis, nucleolus, CHO cells, autoradiographic and biochemical study, 577
— label, [*methyoxy*-^{14}C]colchicine and [^{14}C]leucine, colchicine inhibition of plasma protein secretion, rat hepatocytes, biochemical and EM study, 42
— label, [^{3}H]arginine, mouse sperm basic nuclear protein after fertilization, autoradiographic and biochemical and histological study, 251
— label, [^{3}H]cholesterol, distribution of cholesterol, mouse brain, biochemical and autoradiographic light and EM study, 333
— label, [^{3}H]colchicine, colchicine-binding protein, mouse liver, relation to microtubules, biochemical and EM study, 609
— label, [^{3}H]colchicine and [^{3}H]thymidine, colchicine inhibition of mitogenic stimulation of lymphocytes prior to S phase, biochemical and cytological study, 128
— label, [^{3}H]glucosamine and [^{35}S]sodium sulfate, Golgi organelle response to antibiotic X537A, phase contrast, fluorescence, and EM study, 425
— label, [^{3}H]leucine, [^{3}H]lysine, and [^{35}S]methionine, slow component of axonal transport, major structural polypeptides of axon, mammalian neurons, biochemical study, 351
— label, [^{3}H]proline, stimulation of chick cornea epithelial collagen synthesis by interaction between cell surface and extracellular matrix, transfilter induction, biochemical and EM study, 275
— label, [^{3}H]thymidine, DNA replication during extra S phases, *Tetrahymena pyriformis*, autoradiographic and cytological study, 204
Radioactive label, [^{3}H]thymidine, effects of serum and insulin on epithelial proliferation and DNA synthesis, mouse mammary gland, biochemical study, 243
— label, [^{3}H]thymidine, in vivo mitosis of nonneoplastic melanocytes, autoradiographic and light and EM study, 663
—, label, [^{3}H]thymidine, mitogenic effect of fibroblast growth factor on early passage cultures of human and murine fibroblasts, cytological study, 451
— label, [^{3}H]thymidine, mouse-human heterokaryon formation, 33258 Hoechst-Giemsa technique, autoradiographic and cytological study, 676
— label, [^{3}H]thymidine, role of microvilli in surface changes, P815Y mastocytoma cells, biochemical and scanning EM study, 568
— label, [^{3}H]uridine, absence of ribosomal DNA amplification, milkweed bug meroistic ovary, biochemical study, 461
— label, [^{125}I]α-bungarotoxin, in vivo recovery of mouse muscle contraction after α-bungarotoxin binding, physiological and autoradiographic EM study, 209
— label, [^{125}I]proteins, receptor mobility and binding of cells to lectin-coated fibers, biochemical study, 76
Rat, egg, lectin-binding sites on zonae pellucidae and plasma membranes, cytochemical EM study, 263
—, hepatocytes, colchicine inhibition of plasma protein secretion, biochemical and EM study, 42
—, kidney cortex, ultrastructural localization of transport ATPase, cytochemical light and EM study, 586
—, liver, endothelial cell junctions, freeze-cleave EM study, 200
—, liver, isolation of centrolobular and perilobular hepatocytes, effect of phenobarbital, biochemical and cytochemical light and EM study, 23
—, liver, isolation and subfractionation of hepatocytes on ficoll gradients, biochemical and cytochemical light and EM study, 1
—, neonatal, photoreceptor differentiation of pinealocytes, light and EM study, 60
—, pancreas, microfilaments and enzyme secretion in exocrine cells, effect of cytochalasin B, biochemical and EM study, 165
—, thyroid, epithelium, effect of thyroid activity on tight junctions, freeze-fracture EM study, 657
Respiration, cytochrome oxidase during embryogenesis, sea urchin sperm mitochondria, cytochemical EM study, 367
Ribonucleic acid, nucleolus, CHO cells, autoradiographic and biochemical study, 577
Ribosomes, milkweed bug, meroistic ovary, absence of DNA amplification, biochemical study, 461
Ricin-binding sites, outer face of azurophil and specific granules, rabbit polymorphonuclear leukocytes, EM study, 183

S

Salivary gland, *Chironomus thummi*, nucleocytoplasmic movement of fluorescent tracers, light microscope study, 652
Sea urchin *Arbacia punctulata*, sperm, mitochondrial cytochrome oxidase during embryogenesis, cytochem-

ical EM study, 367
Sea urchin *Tripneustes gratilla*, oocytes, preparation and purification of polymerized actin, biochemical and light and EM study, 305
Serum, effect on epithelial proliferation and DNA synthesis, mouse mammary gland, biochemical study, 243
Sialyltransferase, ganglioside, induction by small fatty acids, HeLa cells, biochemical and light microscope study, 414
Skin, lizard, iridophore crystals, biochemical and light and EM study, 635
—, melanocytes, in vivo mitosis, autoradiographic and light and EM study, 663
Spectrin association with actin, human erythrocyte ghosts, biochemical and EM study, 508
Sperm, mouse, basic nuclear protein after fertilization, autoradiographic and biochemical and histological study, 251
—, sea urchin, mitochondrial cytochrome oxidase during embryogenesis, cytochemical EM study, 367
—, starfish, cytoplasmic activation of oocytes, histological study, 86
Spermatozoa, human, immotile, lack of dynein arms, biochemical and EM study, 225
Spindle microtubules, annelid oocytes, pressure-induced depolymerization, thermodynamic study, 114
Sporulation, antibiotic synthesis, and amino acid uptake, *Bacillus brevis*, biochemical and EM study, 233
Starfish *Asterias forbesi*, oocytes, cytoplasmic activation by sperm and divalent ionophore (A-23187), histological study, 86
Surface, cell, distribution and mobility of anionic sites, baby hamster kidney cells, cytochemical EM study, 470
—, cell, interaction with extracellular matrix, stimulation of chick cornea epithelial collagen synthesis, transfilter induction, biochemical and EM study, 275
— changes, role of microvilli, P815Y mastocytoma cells, biochemical and scanning EM study, 568
Surface, polylysine-coated, adhesion of cells, EM study, 198
—, upper cell, and active cell movement in culture, letters to the editor, 215, 216, 218

T

Testololactone and dibutyryl cyclic AMP antagonism of concanavalin A capping, CHO-K1 cells, cytological and EM study, 392
Thyroid, rat, epithelium, effect of thyroid activity on tight junctions, freeze-fracture EM study, 657
Tissue culture, mouse mammary adenocarcinoma cells, occluding junctions and dome formation, cytological and freeze-fracture EM study, 316
— culture, upper cell surface and active cell movement, letters to the editor, 215, 216, 218
Transport, axonal, slow component of, major structural polypeptides of axon, mammalian neurons, biochemical study, 351
Tyrocidine synthesis, sporulation, and amino acid uptake, *Bacillus brevis*, biochemical and EM study, 233

V

Virus, Sendai, induction of cell fusion, ultramicroinjection of macromolecules or small particles into animal cells, biochemical and EM study, 292
Vitelline membrane elevation, starfish oocytes, activation by sperm and divalent ionophore (A-23187), histological study, 86

Z

Zonae pellucidae and plasma membranes, mammalian eggs, lectin-binding sites, cytochemical EM study, 263
Zonula occludens, rat thyroid epithelium, effect of thyroid activity, freeze-fracture EM study, 657
